EDUCATION

Programmer Analyst
IP Santo Tomás
Santiago · 2018 – 2022

Self-taught before formal studies; participated in innovation fairs and hackathons.

INTERESTS

Aggressive inline skating, 3D modeling, clothing design and manufacturing, day trading — expressions of constant curiosity, spatial thinking and analytical discipline.

PROFILE

With over **8 years of experience**, I started my career at Yapo.cl building components and flows for a **~1M daily-user marketplace**, laying strong foundations in TypeScript, design systems, and testing. At Globant I became the go-to frontend technical reference across high-profile projects for **Disney, UNICEF, LATAM Airlines** and **British Airways** — shipping Next.js applications to production, unblocking critical pre-release issues under pressure, and serving as the architectural decision point within my team. Most recently, as founder of **WEBAI3**, I independently designed and deployed ERC-20 contracts, a multisig vault architecture using Gnosis Safe, and an AI inference layer on top of X402 and Ethereum — extending my expertise from frontend into full-stack decentralized development.

EXPERIENCE

Founder & Engineer

WEBAI3 · Santiago, Chile · Dec 2025 – Present

- Designed and deployed **ERC-20 token contracts** with a full test suite (Hardhat + Foundry).
- Implemented a **multisig vault architecture with Gnosis Safe**: signer policies, timelock and recovery logic.
- Designed the AI inference layer on **X402 + Ethereum**: multiple microservices, on-chain billing and endpoint security.
- Full ownership of technical and product roadmap, operating autonomously end-to-end.

Web UI Developer (Sr.)

Globant · Santiago, Chile · Feb 2022 – Jun 2025

- Shipped Next.js apps to production for **Disney, UNICEF, LATAM Airlines** and **British Airways** — 1 to 2 projects per year.
- Go-to technical reference for the frontend team (**4 engineers**): owned the most complex tasks, supported teammates on theirs, and was the architectural decision point.
- Resolved critical pre-release blockers under tight deadlines across multiple client accounts.
- Managed end-to-end pipelines: design systems, CI/CD, performance audits and technical debt.

Frontend Engineer

Yapo.cl SpA · Santiago, Chile · Feb 2019 – Jun 2021

- Built and maintained components and user flows for a marketplace with **~1M daily users**.
- Implemented design systems and analytics integrations using TypeScript, Custom Elements and SCSS.
